

Get ~60% off your IT Spend with Headache-Free Hosting Solutions

Unlock access to the world's infrastructure through Lyrid's Global Bare Metal Network. With frictionless Kubernetes and elastic microservices infrastructure options, your ideas can come to life faster and with 60% less costs.

Why work with Lyrid?

Accelerate time-to-market while enjoying flexible attributes like Kubernetes and microservices.

Starting at \$5k/month

~60% lower pricing than AWS, GCP and Azure

30%

Faster time-to-market

Cut Your IT Spend

Our bare metal network solutions bypass the need for traditional IaaS components, eliminating hypervisor taxes, individual VM fees, and hidden OS licensing costs.

60%

Lower IT Costs

Hassle-Free Tech

Leverage cutting-edge technology without hiring new engineers. You can be a one-person development team, with access to 24/7 engineering assistance through the Lyrid developer network.

10x

Infrastructure efficiency

Scale Globally With Our Data Center Cloud Network

Leverage our local and regional data centers for seamless integration of on-premises infrastructure, public and private clouds, and unified management across environments.

75%

Less maintenance overhead

Customizability and Flexibility

Create an experience that is uniquely yours with the Lyrid managed suite- letting you customize deployment regions, vendors, clusters, and so much more.

99.99%

Uptime

Mitigate Security Risk & Workflow Errors

Securely store data on-premises with built-in compliance and security measures. Automate workflows across environments to minimize errors.

Lyrid scalability and code portability give us peace of mind that no other providers can. We are very satisfied with excellent customer service and skillful technical support that make Lyrid stand out.

CUSTOMER SUCCESS STORY

Aido Health Cut 58% Per Year in Cloud Spend and Platform Engineering Effort

“We want to fully utilize our machine clusters at Lyrid to increase our cost savings in the long run compared to what we ran in Google, as based on our calculations, our spending at Lyrid will scale linearly.”

Amount Saved	\$82,000 saved on AWS
Timeline	2-3 months
Team Size	1 developer
Techstack	Kubernetes, Microservices, MQTT Protocol, Epsilon, Lyrid Managed Suite

Access Intelligent Automation Tools

App Deployment

Build fast, deploy in one click & minimize errors with our user-friendly deployment platform.

Containers

Lyrid's containers ensure consistent and predictable application execution across diverse environments.

Managed hosting

Lyrid is a fully-managed cloud hosting solution built with speed, flexibility, and performance in mind.

Managed databases

Let us manage your MongoDB, MySQL, PostgreSQL, and Redis databases while you focus on your apps' development and growth.

Kubernetes

Launch production-ready Kubernetes in seconds, effortlessly scaling your app to meet growing demand

Storage

Store your data while enjoying faster page loads, improved performance, and savings on infrastructure and bandwidth.

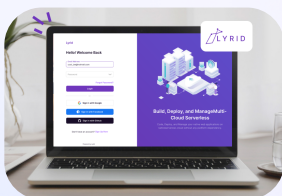

Add-Ons

Software Development Services

Access our world-class engineers to produce the best solutions for any engineering need.

Cloud Migration

Migrate seamlessly to any cloud by keeping your infrastructure consistent in every cloud.

Lyrid is a multi-cloud solution which makes cloud native developments automated and affordable. With Lyrid, enterprises can innovate affordably, increase cloud vendor flexibility and test new ideas without disrupting existing processes.
